

INTRODUCING AUSTRALIA'S FIRST SYNTHETIC GRASS MADE FROM SUGAR CANE.... CLASSIC GT 40

This new **premium landscaping solution** is made from **60% renewable resources** and is the latest innovation by Australian manufacturer, APT Classic GT has all the benefits of a durable synthetic grass, but is now **environmentally friendly**-
HOLY SUGAR!

Utilising **Green Technology (GT)** recently developed for **Olympic Hockey fields**, APT have revolutionised the synthetic grass industry with this **sustainable** solution that gives consumers an opportunity to get their weekends back whilst reducing their carbon footprint.

LANDSCAPING SOLUTIONS JUST GOT GREENER.

SO HOW DOES IT GET FROM BEING SUGAR CANE TO YOUR NEW LAWN?

- 1 Sugar cane captures CO2 from the atmosphere
- 2 Sugar cane is crushed mechanically
- 3 Extracted bi-product is fermented to create ethanol
- 4 Under heat and pressure, water is removed from the ethanol to create an ethylene gas
- 5 Ethylene gas is transformed into small polyethylene beads
- 6 We add **HeatBlock™** technology to the beads to keep the product cool and green
- 7 Yarn is extruded in our Melbourne based factory
- 8 Classic GT is the worlds first environmentally friendly synthetic lawn!

AUSTRALIAN MADE 15 YEAR WARRANTY
