Perfect Protection Starts Here:

THOR form-A-guard is an Australian made product exclusively designed for the building and construction industry where protecting finished surfaces and eliminating defects is essential.

Protecting from scratches and scuff marks for timber floors, tiled floors, vinyl, polished concrete (Cured Sealed Finished Surfaces), bench tops, bath tubs and shower bases. THOR form-A-guard can be applied in the following 3 easy steps:

1. Apply THOR Membrane Tape to a cured, sealed or finished surface that is clean and free of any dust or residue.
2. Roll out the THOR form-A-guard to cover the cured, sealed or finished surface, overlapping each run
3. Use THOR Joining Tape to join the overlapped THOR form-A-guard. THOR Joining Tape can also be used to secure the edges of the THOR form-A-guard if required for prevention of dust or residue migration. If securing edges, apply a maximum 1 metre strip of THOR Joining Tape allowing a minimum of 1 meter spacing between runs and ensure the THOR Joining Tape is applied to the THOR Membrane Tape only.
THOR Joining Tape **SHOULD NOT** be applied directly to any finished surfaces as damage may occur.

This quick and easy application ensures THOR form-A-guard remains a market leader in its category.

*It is advised that periodic checks should be conducted on the THOR Membrane Tape after one month of application to ensure clean removal.
