Blue Tongue Off Road Trekka Camper

The Blue Tongue Off Road Trekka Camper would arguably be one of the best value for money off road camper trailers on the market. This camper is uniquely designed with loads of storage, durability and style in mind and built in Australia. It is built tough to take you to any destination you like. It has a massive integrated slide out storage box to fit a fridge/freezer and generator or just more storage for your camp gear. There's side opening doors to the trailer with another

slide out drawer, room for 4 jerry cans in a lockable compartment, rear mounted spare wheel and bike rack socket mounted to the front. The Off Road Trekka comes with a host of inclusions but you can upgrade a couple of features to make it uniquely yours.

Our camper tents are made to our custom design and styles and will exceed your expectations. The canvas used on the roof of your Blue Tongue Camper is a Silver Coated 475gsm (14 Oz) blended cotton

canvas. In a similar process to the 475 gsm (14Oz) wall fabric this fabric is treated further to provide 1500mm hydrostatic water head and maintains the same level of breathability. After weaving the fabric is rolled under pressure to accept the silver coating that blocks out more than 98% of UV radiation and heat. The technology used in this protective coating has been developed to provide a level of finish is rarely used in a canvas product.
