

Hi! I'm Frank Green.

My philosophy is to design innovative products that are stylish, functional and good for the environment - because I believe that everyday products can be beautiful and sustainable.

I want to change the way people think about reusable products. It's my mission to motivate others to live more sustainably and to reduce unnecessary waste.

I'm also passionate about supporting local industry. Everything I do is designed, engineered and made in Australia.

Regards,
Frank Green.

Why I think you'll love our Products

- Clever one handed, push button operation opens and closes the spill resistant lid
- The drinking spout is designed for effortless drinking
- Smart double walled thermo plastic outer layer keeps your coffee hotter for longer
- BPA free materials that are stain and odour resistant – taste your coffee or water and not your cup or bottle
- Comfortably fit in all standard cup and bottle holders
- Dishwasher safe for easy cleaning
- Come in a range of contemporary colours
