Kangaroo leather has been conclusively proven to be one of the most durable in the world.

As a natural product derived from free ranging animals Kangaroo leather can vary in colour and thickness. The scratches and scarring that are found on your Jacaru product naturally occur on Kangaroo leather - A Jacaru hat is as unique as its owner.

Kangaroo leather can endure high stress wear, is resistant to abrasion and has UV protective properties.

MARKS AND SCRATCHES

As leather is a natural product from free ranging animals it is natural for there to be range marks and other marks associated with the harsh environment that Australian cattle, sheep and kangaroos live in. Suedes that are taken from the flesh side of the hide have less scratching and marks, but if you want strength and durability full grain leathers are the best.

COLOUR VARIATION

There may be some colour variation from order to order. This is beyond our control due to tanneries using many different breeds of bovine hides. Colours of products in this brochure may vary to actual material used, due to printing processes.

Hat trims are subject to change without notice.

Protect and preserve your Jacaru hat, garment or bag with Jacaru custom made product care.

Create a water repellent barrier by using our Rain & Stain Suede Protector to repel water and oils. Ideal for suede and nubuck hats, jackets and shoes.

Our Leather & Oilskin Dressing recoats your oilskin cotton and oiled leather products to maintain its water resistance.
