Why a Camp King Canopy?

Purchasing a canopy can be a big investment, you want to make sure you do your research and investigate exactly what each prospective company can offer you. You work hard for your money, make sure that you are investing in a reputable company, that will deliver you a quality product.

When purchasing a canopy, we recommend you consider the following:

1. Are you buying from a reputable company that has experience in canopy building? Do they have examples of their work on display, do they welcome inspections on their work and do they have reviews on their work? Do they have quality processes in place?

We have been working in the Sheetmetal industry for over 20 years. We have owned and operated one of Brisbane's premiere metal shops Ausmetal Engineering for over 7 years. This metal shop has won multi awards over that time for its innovation, quality assurance processes and high customer morale.

We extended this business model over to our Camp King Industries brand in 2016. We bring our experience and quality assurance processes with us. We have examples of our work on display at our workshop, customers are also more than welcome to view the build stages of their own canopies. We can offer build progress reports and pictures, videos of your build, if you cannot be here to view it in person.

2. Does the company you are buying from have adequate insurances and policies that cover your vehicle during the manufacturing process? Ask to see certificates.

We have additional care and control insurance included within our Insurance policy. This policy covers your vehicle whilst in our workshop. We also have 20-million-dollar Public Liability Policy. Certificate available at Reception.

3. Does the company you are purchasing from have qualified tradesmen either building, or over seeing each build process? Ask to see Certificates.

All our canopy builds are either fabricated by qualified tradesmen or are carefully overseen by qualified tradesmen. We have various quality procedures in place to ensure that apprentices are supported and monitored during canopy builds. We take quality very seriously. We are trade qualified metal engineers and we have a mechanical engineer who works alongside us also.

4. That the company can provide you with an official Terms and Conditions Policy, stating their terms of trade and warranties information.

Once you have placed your order for a Camp King Canopy or Tray you will be sent an official Order Form from us. This order form will have all your build details listed as well as all your build inclusions. You will be required to enter all your details, sign and return the form, before the build will commence. The order form will stipulate deposits, periodic payments and any other terms we stipulate. We will provide you with a full copy of our trading terms up front.

**Please call to book an appointment for any canopy viewings. We are located at Ausmetal Engineering
9-11 Calcium Court, Crestmead QLD 4132**

Our Office hours are 7am-3pm Monday to Thursday & 8am-12pm on Fridays.
