

Four Simple Steps to Design Your System.

1. Measure your wall space.
2. Decide on how many lights you require.
3. Choose your kit by factoring in the answers to 1 & 2.
 - **The Micro kit:** Runs up to 6 lights (over approx. 6m of track)
 - **The Mini Kit:** Runs up to 8 lights (over approx. 9m of track)
 - **The Maxi Kit:** Runs up to 18 lights (over approx. 20m of track)
4. Choose the colour of your light wands and lamps.
(choice of stainless steel with white fittings or stainless steel with charcoal fittings)

The Gallery lighting System

Full of Fotoz Gallery,
Mackay

We know it's not just how you
HANG your artwork that's important;
it's how you light it too.

**Whether you have family photos,
a Picasso collection or anything
in between, anyone can achieve
an amazing display with the
Gallery Lighting System.**

"Being one of the first galleries to have used your
lighting system, my initial gallery in Maleny achieved
excellent results in sales and I credit this directly to
the excellent illumination of our artwork"

- Gary Myers, Artist, Queensland

Choosing the correct lighting is crucial to
any display. As such, The Gallery Lighting System
offers an unbeatable range of features and benefits:

DIY PRODUCT:

Anyone can install The Gallery Lighting System.
It's a 12-volt system, so no electrician is required;
PLUS it utilises the same track that hangs your art.

ECONOMICAL:

Not only is the system affordable, low wattage LED
lamps are used to keep running costs low.

FLEXIBLE:

Move the lights anywhere along The Gallery System
track where the lighting system is installed.

PROFESSIONAL:

The Gallery Lighting System delivers a professional
look and feel to any display.
