

Premium Eco-friendly Wood Greeting Cards, Gift Tags, Journals, Notebooks & Notepads

- Exclusively designed for Greenigo by Daniella Germain

Greenigo exists to bring to the world exclusive sustainable and eco-friendly products that convey a feeling of uniqueness and deep caring. Our continuous search for an alternative stock to paper, led us to find wood veneers which are as thin as paper made from wood – a renewable resource known to humans for more than a millennium. Wood veneers are biodegradable and more importantly, the veneering process uses very less water and chemicals compared to the paper making process! By the way, we source wood veneers made from FSC Controlled Wood logs. Using latest technology in digital & offset printing and wood veneers, our products are proudly made in Melbourne.

daniella germain

Daniella Germain is a Melbourne based freelance illustrator and designer whose work is largely inspired by the beauty of Australia's natural landscape and countryside. She dreams of one day living in the Victorian countryside with some chickens and maybe an alpaca or two. In her illustrations for Bush Greetings, Daniella has captured the texture, colour and uniqueness of Australian flora and fauna with fine line work combined with bold colour.
