AUSTRALIAN MADE

Australian Made is so Important
Because it Means Our Products are
100% Natural, Fresh, and Healthy

A WORLD CLASS SUPPLY CHAIN

AUSTRALIAN DAIRY FARM

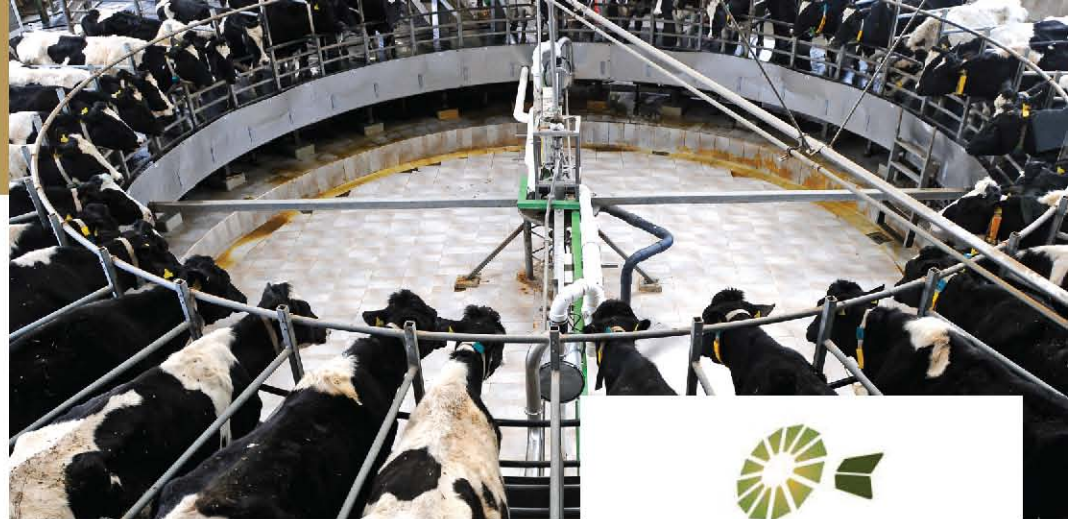

Australia and New Zealand dominate the world market in milk. These two countries together export nearly half of all internationally traded dairy products. The Australian dairy industry is now firmly established as the world's third largest dairy trader, with more than 50% of its milk production in 2012 being exported.

AUSTRALIAN FRESH MILK

Australian Milk is a highly nutritious, safe and natural. Government regulations ensure that milk and dairy products conform to food standards for quality, consistency and food safety. The composition of milk is governed by the Food Standards Australia New Zealand (FSANZ) Food Standards Code (the Code). These standards are consistent with international standards – milk consumed in nearly all developed countries will have very similar standards.

AUSTRALIAN PRODUCTION

To ensure the production of products prepared and delivered by a local manufacture are safe and of the best quality, a food safety and quality program has been implemented that uses HACCP and ISO techniques to ensure that potential hazards during the processes are recognized and controlled. The principles of GMP (*Good Manufacturing Practices*) are also implemented to ensure a high level of hygiene and housekeeping is maintained at all times.

THIS FARMER IS A PROUD VFF MEMBER

ROYAL AUSNZ IMPROVES YOUR CHILD'S GROWTH
AND DEVELOPMENT, BRAIN DEVELOPMENT,
IMMUNITIES, BONE STRENGTH AND EYE SIGHT

NO PRESERVATIVES

NO ARTIFICIAL
COLOURS

NO SYNTHETIC
FLAVOURS

1 INFANT FORMULA

STEP 1: SUITABLE FOR 0-6 MONTHS OLD

BREAST MILK IS BEST FOR BABIES. BEFORE YOU DECIDE TO USE THIS PRODUCT, CONSULT YOUR DOCTOR OR HEALTH WORKER FOR ADVICE

NO PRESERVATIVES

NO ARTIFICIAL COLOURS

NO SYNTHETIC FLAVOURS

2 FOLLOW ON FORMULA

STEP 2: SUITABLE FOR 6-12 MONTHS OLD

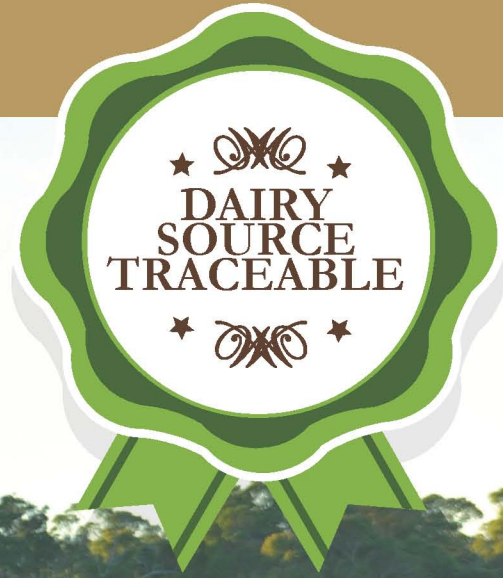

3 TODDLER FORMULA

STEP 3: SUITABLE FOR 1-3 YEARS OLD

**IN-ADVANCED DIGITAL SYSTEM USED IN THE DAIRY FARM
EACH BATCH OF INFANT FORMULA IS ABLE TO BE TRACED
BACK TO THE RAW-MATERIAL**

**MADE BY FRESH MILK DIRECTLY
ALL CONTENTS MIX WITH FRESH MILK
1 SPAY ONLY AND DIRECTLY TO INFANT FORMULA
NO DRY BLENDING**

BRAIN DEVELOPMENT

Vitamins, minerals, trace elements and long chain polyunsaturated fatty acids (LC-PUFA) are essential for neurological development.

NUCLEOTIDES

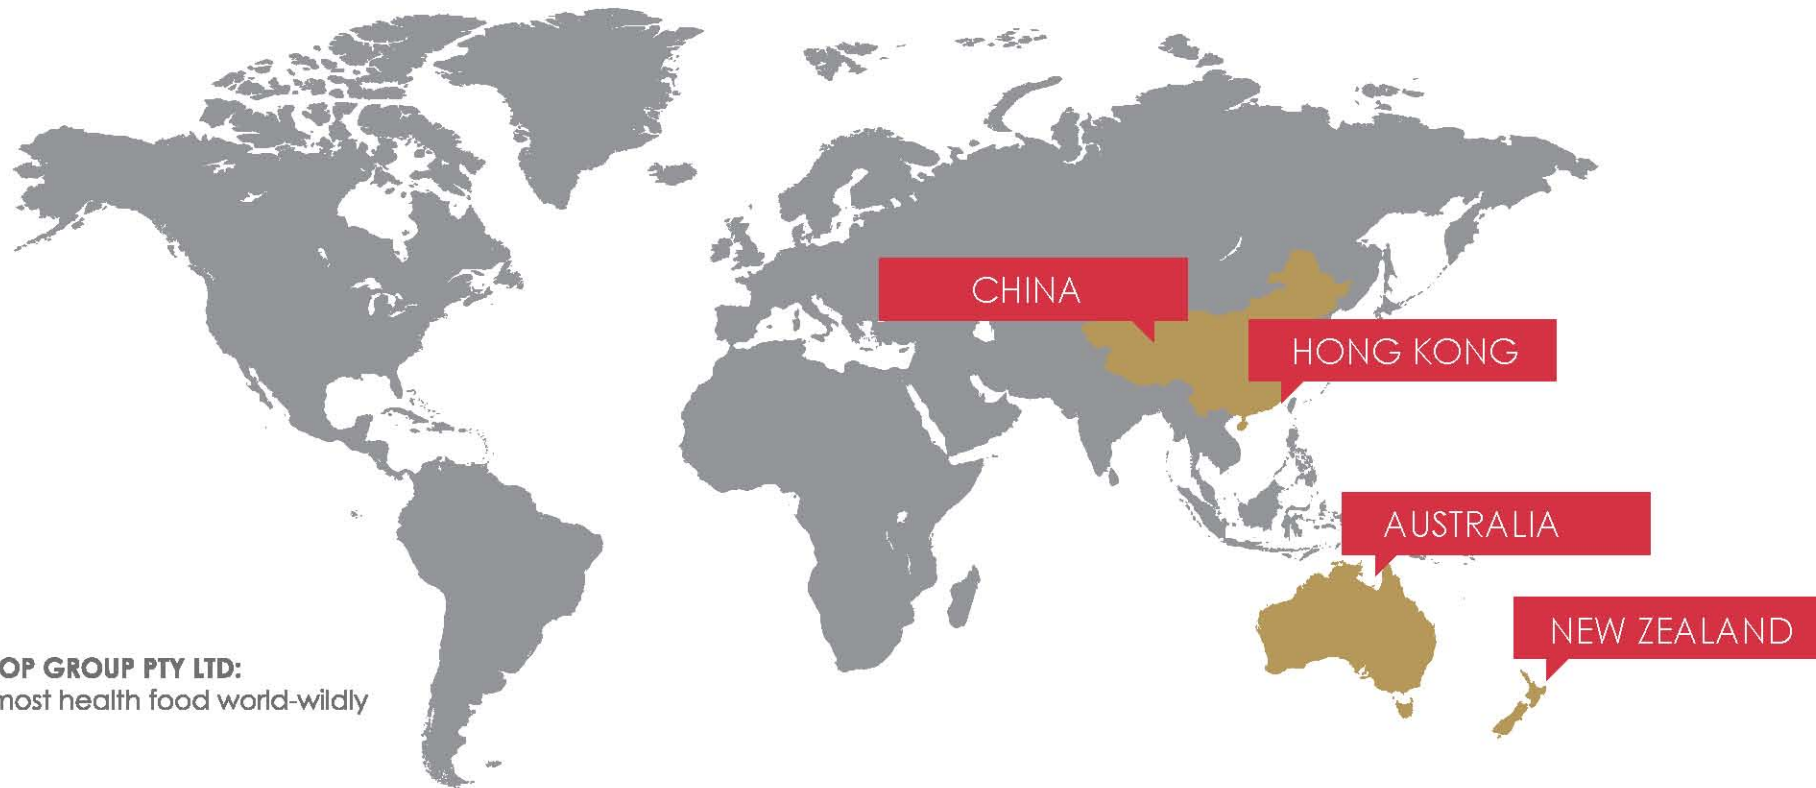

Nucleotides play a role in almost all biological processes. Infants having nucleotides are more like breast fed infants particularly in aspects such as faecal flora, immune response and lipid patterns with rapid growth in infants. Nucleotides are needed in tissues with fast turnover gut and immune system. Nucleotides also enhance vaccine response and reduce incidence of diarrhoea.

DHA/ARA

DHA /ARA is important for the growth and development of vision and the nervous system functions used by the body to make molecules that promote or control inflammation. An important immune response are anti-inflammatory and can block the effects of oxidative stress, helping bone formation of the major LC-PUFAs in the retina and evidence linking this to visual development. Arachidonic Acid is one of the major LCPUFAs in the retina and evidence linking this to visual development used by the body to make molecules that promote or control inflammation, an important immune response.
