

Our promises

Purity

- To use active ingredients from nature that provide real skin benefits.
- To source only the most natural, raw ingredients, with extraction methods that do not interfere with the integrity or purity of the ingredient.
- To formulate only safe, 100% botanical formulas free from toxic ingredients.

Simplicity

- To create products that are part of a simple θ effective skin health routine: cleanse, treat, hydrate.
- To offer effective and multipurpose skincare solutions that save time, money and clutter.

Integrity

- To actively treat your problematic skin conditions.
- To continuously invest in innovation, research and development without following trends or fads.
- Honest labelling and packaging claims that are authentic and evidence-based.

Melbourne based Naturopath and Herbalist, Barbara Filokostas, has treated skin concerns since 1994 with holistically blended botanical formulas. Inspired by Hippocratic medicine and her grandmother, a natural medicine healer, Barbara became passionate about healing the skin using natural ingredients.

Botáni stands out from the crowd with naturopathically formulated, scientifically-backed formulas, leading the way in treating real skin conditions using only botanical, toxic-free ingredients.

For all skin types; with a focus on treating acne, dehydration, fungal infections, ageing skin, and skin sensitivities, Botáni delivers real results with pure, authentic and simple, 100% vegan skincare using only natural ϑ certified organic ingredients.

Botáni is formulated using premium active botanicals, food grade and superfood ingredients to deliver real skin results minus harsh, toxic ingredients

Our key botanical ingredients

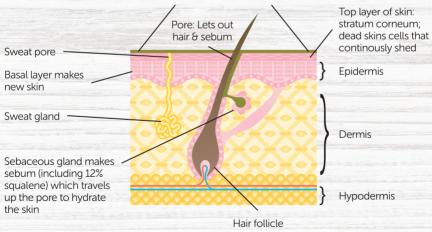

Olive Squalene

OUR SKIN CONTAINS 12% SQUALENE; an essential hydrating lipid that diminishes over time, **leading to dehydration and premature ageing**.

OLIVE SQUALENE mimics the skin's natural Squalene, **providing unrivalled hydration** and antioxidant protection.

Our skin **NEEDS Squalene** replenishment DAILY in order to sustain the skin's protective layer to maintain hydration levels deep within the skin.

Squalene mixes with sweat to form the skin's protective layer: acid mantle
