- Relieve symptoms of osteoarthritis

Mysekyo - Joint & Bone

Glucosamine is naturally produced by the body to protect the ends of bones, like shoelace-caps. They are usually derived from crustaceans.

Chondroitin is also naturally found in the body and it is useful for treating osteoarthritis and reduces breakdown of cartilage.

Glucosamine + Chondroitin Combination provides efficacious quantities of glucosamine sulphate and chondroitin sulphate, combined with manganese and curcumin for optimizing joint health.

Glucosamine and Chondroitin sulphate are essential components of joint tissue involved in the production of hyaluronic acid, which is an important component of the synovial fluid that lubricants the joints, and major component of the connective tissue in the skin.

Manganese and Calcium are required for the synthesis of collagen and cartilage.

Curcumin is one of the most powerful naturally-occurring antioxidants known to mankind. It is used to treat tumours in animals with resounding success.

Glucosamine and Chondroitin

Glucosamine and chondroitin are two molecules that make up the type of cartilage found within joints. Inside your joints, cartilage undergoes a constant process of breakdown and repair. However, to be properly repaired, the building blocks of cartilage must be present and available. The theory behind using the glucosamine and chondroitin joint supplements is that more of the cartilage building blocks will be available for cartilage repair.

● **Glucosamine** is a part of a molecule called a glycosaminoglycan. This molecule is used in the formation and repair of cartilage.

● **Chondroitin** is the most abundant glycosaminoglycan in cartilage and is responsible for the resiliency of cartilage.

Treatment with these joint supplements is based on the theory that oral consumption of glucosamine and chondroitin may increase the rate of formation of new cartilage by providing more of the necessary building blocks. Product Details

Ingredients

Each capsule contains:

Glucosamine hydrochloride	400mg
Chondroitin sulphate	200mg
Calcium sulphate	11.6mg
Magnesium sulphate	6.2mg
Curcuma longa (Turmeric) extract	250mg

- Brand: Mysekyo Australia Health Products
- Format: Tablet
- Quantity: 60 Tablets
- Dosage: Adults: Take one tablet 3 times a day with food or as recommended by your healthcare professionals.

Warning:

Do not use if allergic to shellfish. If you have a medical condition, are pregnant, lactating, trying to conceive or taking medications, consult your health care practitioner before using this product.

Keep out of reach of children

Do not contain: Sugar, Salt, Yeast, Gluten, Corn,

Soy, Dairy products, Artificial Flavouring, or Artificial Preservatives.
