

QUATRO
DESIGN®

2020 PRODUCT
CATALOGUE

A large, lush green palm frond is positioned on the left side of the frame, extending from the bottom left towards the center. The frond is composed of many long, thin, green leaves that are slightly curved and layered, creating a dense, textured appearance. The background is a solid, bright white, which makes the green of the palm stand out prominently.

WHERE LANDSCAPE

A white, modern, rounded object, possibly a piece of furniture or a sculpture, is placed on a light grey, textured surface. The object has a smooth, curved top and a slightly wider base. The background is a solid, warm orange wall. The lighting is soft, casting a subtle shadow of the object onto the wall behind it.

We stand at the intersection of landscape and architecture, our work is founded in balance — between people and place — enhancing the Australian built environment through quality, design detail and durability that surpasses time and trends.

OUR HUMBLE BEGINNINGS

The availability of locally manufactured Glassfibre Reinforced Concrete (GRC) pots and planters in the early 2000's was exceptionally limited. There was minimal ability to customise or offer solutions outside of those available in standard GRC product ranges then on offer.

Originally set up to design Glassfibre Reinforced Concrete products in 2004 to address this need, Quatro Design merged with our GRC manufacturer in 2007, at which time we were designing and manufacturing our first product ranges from a small factory in Billinudgel, near Byron Bay, NSW.

We were delighted by the market's response and due to demand we eventually expanded to a larger premises at Currumbin on the Gold Coast, QLD.

We have grown from these humble beginnings into the leading GRC manufacturer of landscape architecture solutions in Australia and currently operate from our large and modern factory in Murwillumbah, NSW.

LOCAL MANUFACTURING

Quatro Design is synonymous with quality. To achieve consistent high quality and durability, our products are manufactured using modern and specialized GRC equipment.

The manufacture of GRC production requires a high degree of hands-on specialized labour coupled with close attention to detail.

Many of our employees are long standing and valued members of our team who understand GRC production and what is required to deliver consistent quality. These highly valued personal skills coupled with modern specialised GRC equipment is an important part of our manufacturing philosophy.

Each piece is checked during the manufacturing process to ensure compliance with our strict standards and to ensure that our products deliver on customer expectations.

We believe in the value of hand finishing all our products, with attention to detail that that has been acquired over years of manufacturing and in supporting the development of our team.

AUSTRALIAN MADE

We're incredibly proud of our Australian Made Certification; the support that we are able to give our local community and the role that we continue to play in enhancing the Australian built environment. We are also aware of our responsibility to our planet and the larger global community, and in response have introduced many greening initiatives in our factory to reduce our footprint.

OUR DESIGN PHILOSOPHY

Our design philosophy has always been guided by the celebration of basic shapes and forms ensuring that every product range will compliment rather than compete with the surrounding landscape.

This philosophy has allowed us to create truly timeless landscape product ranges.

We work with leading architecture, landscape architecture and design firms to provide solutions for their projects. Additionally, we work collaboratively with some of Australia's best design talent to design some of our own product ranges.

"I don't divide architecture, landscape and gardening; to me they are one."
— LUIS BARRAGAN

BOWLS

Bring harmony into the landscape with graceful curves. Our collection of elegant planter bowls suits a variety of applications, including for use as water features. Their classic designs surpass all time and trends.

DESIGNER BOWLS

The signature tapered forms of our Glassfibre Reinforced Concrete (GRC) Designer Bowl collection lends itself to a variety of applications and can be used as planters or incorporated into water features. Both the 1800 & 2300mm bowls can be used as integrated seat planters with the option of specifying a custom timber top.

Visit quatrodesign.com.au for product specifications and drawings.

SUPER BOWLS

Our innovative collection of oversized Glassfibre Reinforced Concrete (GRC) planter bowls is an industry first and are some of the largest planters available worldwide. Their simple yet elegant curves bring balance with just a touch of theatre to large open spaces. The 4000 Super Bowl is manufactured in four segments that is bolted together on site, this allows for quarter and semi-circle configurations too, if required.

Visit quatrodesign.com.au for product specifications and drawings.

STREET FURNITURE

Our seating solutions provide a moment of
respite and reprieve in the urban environment
— a reconnection between people and place.

SOUL

Inspired by a traditional flower pot and designed as a complete public space solution this collection consists of complimentary planters and seats. Made in durable Glassfibre Reinforced Concrete (GRC), their simple and elegant design bring a timeless and sometimes quirky quality to any installation. You have the option of incorporating hardwood timber decks or timber bench seating onto selected modules.

Visit quatrodesign.com.au for product specifications and drawings.

GEM

INSPIRED BY THE FACETS OF A CUT GEMSTONE

This GRC collection of seats and planters was designed to work on sloping and level surfaces. The planters are made in two parts and can be joined together in different configurations to alter the planter top profile. The seats can similarly be rotated and levelled on sloping surfaces.

Visit quatrodesign.com.au for product specifications and drawings.

DESIGNER: FORREST GILLHAM

Forrest has made a huge impact on the Australian built environment, since being awarded the 'Most Outstanding Student in the Final Year of Industrial Design' when he completed his Bachelor of Design (Industrial Design) degree in 2009. He is an acclaimed designer and important contributor to any design team that he collaborates with. Forrest has been associated with many successful product designs and custom projects. He is passionate about good product design and draws inspiration from his vast knowledge of architectural design as well as furniture and industrial design.

PEBBLE

This iconic GRC collection of seats successfully finds the balance between raw nature and the rounded form to add a sophisticated yet natural element to public space design and development.

Visit quatrodesign.com.au for product specifications and drawings.

DESIGNER: SURYA GRAF
Acclaimed Australian designer Surya Graf has a background in both Architecture and Industrial Design. He's exhibited and has been published both nationally and Internationally, and is the recipient of numerous design awards including the AILA National Landscape Architecture Awards and Good Design Awards. Through his studio practice, he believes in maintaining both social and cultural context for design whilst developing products mainly for the urban environment. His design philosophy is materials led and process driven, with a clear focus on user needs.

FLINDERS

Named after its design inspiration and first installation — the Flinders Street Cultural Precinct redevelopment in Townsville, this GRC range will compliment any contemporary urban design project.

This collection offers an array of seating options that can be individual or linked elements. Recessed timber accents are also available for added interest and contrast.

(Note that all benches with returns are manufactured as shown, and cannot be rotated to face the opposite direction.)

Visit quatrodesign.com.au for product specifications and drawings.

MODULAR BY NATURE

DESIGNER: ALEXANDER LOTERSZTAIN

Alexander Lotersztain is an Argentinian born Australian designer and founder of the multi-disciplinary design studio Derlot. This highly awarded studio specialises in product furniture and interior design, as well as hotel concepts, branding and art direction with a long list of international clients.

His work appears in design journals around the world and can be found in the collection of Pompidou Museum in Paris. He is highly awarded in both product and interior design and in 2010 he was bestowed the inaugural Queensland Premier's Smart State Designer of the Year fellowship award.

He was named one of the 100 most influential designers worldwide in &fork by Phaidon and is among the top 25 designers to collaborate with Monocle.

Alexander is a design advisor to a number of private and government projects. He regularly presents at conferences such as TEDx and often participates on design judging panels, both in Australia and abroad. He has also appeared on Australian television, as a mentor to contestants of The Renovators.

FLEX

These Glassfibre Reinforced Concrete (GRC) seating modules can be combined to create continuous seating that flex back and forth. Two radius options (2700 & 5800 mm) are available, and are compatible with each other to create both tighter and wider curves when installed.

Visit quatrodesign.com.au for product specifications and drawings.

CURVED MODULAR SEATING

QUAD

This GRC collection provides dimension and scale to large open spaces. It delivers on large and free-standing bench seating; and has an integrated planter.

There are two versions available — Type A allows for the entire base to be filled with soil enabling tree roots to extend out further. Type B has a 1.1 m square inner planter to hold the soil and is ideally suited to shrubs.

Visit quatrodesign.com.au for product specifications and drawings.

TWIG

Designed by acclaimed designer Alexander Lotersztain this Glassfibre Reinforced Concrete backless bench with its branch-like formation allows for the creation of meeting points in its surroundings.

It can be used as a bench or a raised connection between the landscape and its bordering hard surfaces.

Visit quatrodesign.com.au for product specifications and drawings.

CIRCULAR BENCH SEAT

BONDI

This large Glassfibre Reinforced Concrete (GRC) seat planter facilitates the introduction of instant, raised planting beds with integrated seating into the built environment.

It is made in four sections that bolt together on site and does not have a built-in floor, which also allows for easy installation around an existing column or tree. Timber slats can also be recessed onto the top if desired.

Visit quatrodesign.com.au for product specifications and drawings.

MATERIAL & STANDARD COLOURS

GLASSFIBRE REINFORCED CONCRETE

Glassfibre Reinforced Concrete (GRC) has made a significant contribution to the technology and aesthetics of the built environment since its introduction in the 1960's. Its ability to be shaped and moulded bring creative freedom and design flexibility to architects and engineers when planning and resolving public space design.

GRC is a mixture of cement, sand and other additives as well as alkali resistant glass fibres that are blended together during manufacturing to create strong yet lightweight products. Glass fibre strands are used to reinforce the concrete, this negates the need for steel reinforcing, which allows the thickness of the GRC to be reduced without compromising on strength.

INTEGRAL CONCRETE COLOUR

During manufacturing the GRC mixture can be coloured by blending mineral oxide pigments with either grey or white cement. Our product collections are available in four standard colours: Charcoal, Concrete Grey, White and Kalgoorlie.

Left to right, Charcoal, Concrete Grey, White, and Kalgoorlie.

CUSTOM OPTIONS

- Coloured mineral oxides can be added to the GRC mixture during production to tint the sand-cement mix (please refer to the full **CCS Pigment Colour Range**).
 - Our products can be painted in virtually any colour, including special paint effects like rust and aged copper.
 - Pitted surfaces or patterns can be moulded onto the surface of some of our product ranges.
 - Tonka Hardwood used on all seating units can be substituted with a timber option of your choice (depending on suitability).
 - Planter boxes come standard with 10 mm high feet, and 25, 50 and 75mm high block feet options are also available on selected ranges.
 - Castor wheels can be fitted to smaller planter boxes.
 - Stainless Steel anti-skate studs can be installed to deter skateboarders from marking planters and street furniture units.
- Please refer to our website for more information on all colours, options and accessories, or contact our sales team to discuss your unique requirements.

CUSTOM PROJECTS

The creation of bespoke pieces is one of the most rewarding aspects of what we do.

We partner with you to collaboratively resolve your design vision, custom project or product concepts.

Our design team work through your drawings and specifications and can provide guidance on the parameters of mould-making and manufacturing with GRC. They can also produce two and three dimensional drawings to help you envision the final product.

The size specifications of some of our existing product ranges can also be modified to suit your project requirements.

Please contact our team to discuss your next project. You can also visit our website for inspiration and to view our completed custom projects.
