

# Using Sprinkle & Soak couldn't be easier.

Enrich your soil and create the perfect environment for plant growth in a few easy steps.

1

## Use as a fertiliser for your plants:

- Simply sprinkle onto the soil around your plants.
- Then with your hose or watering can, lightly water around the plant so it's soaked-in.
- Use regularly during the growing season through spring, summer and autumn.

2

## Power-up your compost, making nutrients more readily available to your plants:

- Sprinkle it into your compost container. Give your compost a quick hose and a gentle turn after sprinkling.
- Continue to turn over your compost material twice a week for 3 weeks. Then your compost is ready for your garden.

Available in  
200g, 1kg, 1.5kg and 5kg packs

## Nurture yourself. Grow your own food.

Biolink4Plants was created by two farming families with years of hands-on experience in agriculture.

Whether you're growing a few veggies in your backyard or in small pots on your apartment verandah, making the effort to be self-sustaining is a satisfying one.

We produce a range of 100% organic products to promote plant growth and help support your veggie patch or floral garden.

**Sprinkle & Soak** is a complete fertiliser that enriches the soil and creates the perfect environment for plant growth.

Our product range for Home Gardeners like you is available at our brand **new online shop**.

# SPRINKLE & SOAK

A Complete Fertiliser for Your Garden

Re-energises the soil and stimulates the healthy growth of all your plants

# Keep your garden happy with Sprinkle & Soak all-natural organic fertiliser

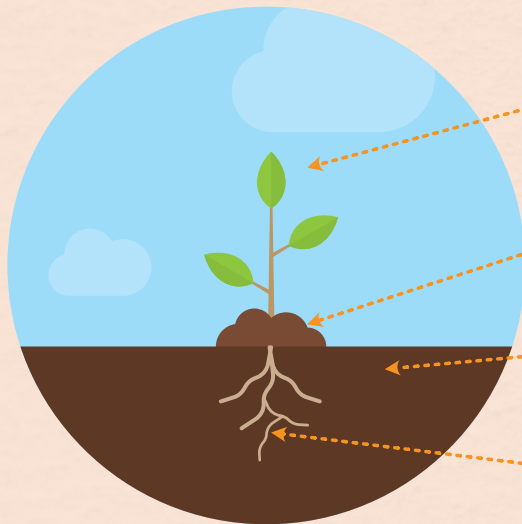

Sprinkle & Soak is a complete fertiliser that enriches the soil and creates the perfect environment for plant growth.

Just like probiotics are good for your health, your plants will love our unique blend of live microbials.

- ▶ Sprinkle & Soak is safe and easy to use with absolutely no chemicals or additives.
- ▶ Sprinkle a little around your veggies, flowering plants and shrubs - or add it to your home compost. Give them a water - then watch your garden thrive!

**Trialled and tested on Australian farms, it's an organic fertiliser that's safe and ideal to use on your home garden.**

Reduces the need for pesticides and chemicals

Helps soil retain moisture and increases drought resistance

Increases soil health and a dynamic ecosystem via beneficial microbials

Boosts nutrient uptake to re-energise your plants

A perfect, natural fertiliser for veggies and flowering plants

Supercharges your home composting system

Safe, easy-to-use and worm-friendly
