

Why do we recommend using different waxes in your salon?

We recommend using different waxes in your salon because everyone has different hair and skin, because men have different needs to women and young skin is different to mature skin.

It's our belief that hair removal is not only linked to the need to remove unwanted hair, but also about the quality of the treatment in the salon, the sensation on the skin, the knowledge of the beautician and customer satisfaction.

Jax Wax Australia manufacturing quality wax since 2000.

Provides fast absorption into the skin protecting sensitive & intimate areas. Contains natural essential oils.

"After 25 years of working in the Beauty Industry, I have trialled many different waxes, finding that each time I was not completely satisfied. I have started recently to use Jax Wax and can say that I am rapt with the range they supply. The products give flawless results and the standard provided by the company is second to none."

Somia Stringer, CEO
Body Ceuticals
