

MELBA™

FOLD & ROLL CHOIR RISER

The MELBA Fold & Roll Choir Riser is a popular addition to our range of Portable Stage Systems and is an ingenious solution for an efficiently simple mobile tiered Choir Riser sought after by Theatrical, Musical, Hospitality Event and Educational industries.

Maximising on the proven design strength of our DIVA Fold & Roll, the MELBA Fold & Roll is simply wheeled along on its easy glide Castor Wheels into the desired position; the Wheels are locked; the Riser Decks are lowered easily with Gas Struts into the horizontal position; safety Hand Rails are stored securely on the rear of the MELBA unit and when the stage is in use they attach simply to the Aluminium edges of the MELBA with finger tightened T Bolts and Wheels; plus

the four Wheel Locks ensure the MELBA remains securely stationary at all times.

Select Staging Concepts' unique in-house design eliminates dangerous pinch points and the need for heavy lifting. This makes the MELBA Fold & Roll Choir Riser extremely user friendly - only requiring one person to operate the complete Choir Riser unit - an excellent solution for organisations with a smaller work force.

MELBA Fold & Roll Choir Riser

Smart Unique Staging on many levels!
